

PROPOSED COUNCIL STUDY ISSUE

For Calendar Year: 2004

Continuing ☐

New ☐

Previous Year (below line/defer) ☒

Issue: Transportation Demand Management (TDM) Program for Higher Density Residential Projects

Lead Department: Community Development and Public Works

General Plan Element or Sub-Element: Land Use and Transportation Element

1. What are the key elements of the issue? What precipitated it?

The City currently has a number of industrial/office sites with mandatory TDM programs. A voluntary transportation management association exists for Moffett Park. Generally, TDM programs have been successful in the industrial/office areas in the City, and now there is an interest in studying the expansion of this concept to apply to Higher Density Residential Projects in the City. The purpose of TDM programs is to reduce traffic impacts related to development. There is limited experience in residential TDM programs.

Last year this item was ranked 1 out of 5 by the Planning Commission and ranked 3 out of 12 for CDD by the City Council. This item fell below the line for the 2003 Council Study Issues.

For 2004 the Bicycle and Pedestrian Advisory Committee has ranked this item 8 out of 14.

2. How does this relate to the General Plan or existing City Policy?

Land Use and Transportation Element

C3.1.7: Minimize the total number of vehicle miles traveled by Sunnyvale residents and commuters.

C3.5.1: Promote alternate modes of travel to the automobile.

C3.6.2: Promote public and private transportation demand management.

3. Origin of issue:

Councilmember: Walker & Howe

General Plan:

Staff: _____

BOARD or COMMISSION
